

Pensacola State College

Radiography Program 2016

The mission of the Pensacola State College Radiography Program is to graduate radiographers who are proficient in radiation safety and patient care and who meet all competency standards required by the American Registry of Radiologic Technologists.

Goals and Student Learning Outcomes

Program Goal #1: Students will be clinically competent

Student Learning Outcome: Practice the safe application of radiation at all times, thereby
Protecting self, patients and other personnel.
Produce diagnostic radiographs safely and competently in the
Context of all radiographic procedures.

Program Goal #2: Students will possess critical thinking skills.

Student Learning Outcome: Utilize critical thinking, problem solving and decision-making
Skills in performing medical imaging procedures.

Program Goal #3: Students will model professionalism.

Student Learning Outcome: Provide compassionate and responsible patient care during
Diagnostic procedures.
Maintain professional appearance, decorum, and confidentiality
In relating to patients, staff and others.

Program Goal #4: Students will communicate.

Student Learning Outcome: Use written and oral communication with patients,
Radiographers and medical staff.
