

**PENSACOLA STATE COLLEGE**  
**MANUAL OF PROCEDURES**

Procedure Title:	Minimum Qualifications for Instructional Personnel	<u>Number</u> 437
Related Policy:	Faculty Qualifications – 6Hx20-4.027	<u>Page</u> Page 1 of 56

**I. Purpose**

The purpose of this procedure is to provide assistance to individuals responsible for faculty selection and credentialing at Pensacola State College (PSC). All full-time faculty members and all part-time faculty members serving as an instructor of record, or primary instructor, are required to meet the standards set by the College and the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC). This faculty credentials manual delineates the credentials required to teach courses in each discipline and program offered at PSC.

Responsible Official:	Vice President, Academic and Student Affairs	
President's Signature:		Date: 11/20/2023

# FACULTY CREDENTIALS MANUAL

## Introduction

The Faculty Credentials Manual provides assistance to individuals responsible for ensuring compliance with faculty selection and credentialing requirements at Pensacola State College (PSC). All full-time and part-time faculty members are required to meet the standards set by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) and PSC. This manual delineates the credentials required to teach courses offered at PSC.

SACSCOC addresses faculty credentials in Comprehensive Section 6: Faculty in *The Principles of Accreditation: Foundations for Quality Enhancement*:

Qualified, effective faculty members are essential to carrying out the mission of the institution and ensuring the quality and integrity of its academic programs. The tradition of shared governance within American higher education recognizes the importance of both faculty and administrative involvement in the approval of educational programs. Because student learning is central to the institution's mission and educational degrees, the faculty is responsible for directing the learning enterprise, including overseeing and coordinating educational programs to ensure that each contains essential curricular components, has appropriate content and pedagogy, and maintains discipline currency.

The information included in this manual delineates the minimum qualifications and qualifying fields associated with each course offered at the College. Organization is by level (Career Certificate, Developmental Education, Lower Level, and Upper Level) and alphabetical order by course prefix within each level. For cases in which qualifications are not clear, the appropriate dean, in consultation with the Vice President, Academic and Student Affairs will render a final decision on qualifications or the need for alternative credentialing.

## Alternate Credentialing

To request approval of credentials through alternate documentation, the following procedure is followed:

- a. The department head drafts a memo requesting approval for the faculty member to teach specific courses based upon alternate credentials. The memo includes an outline of the justification of the alternate credentials; documentation of those credentials is attached.
- b. The supervising dean reviews the memo requesting approval of alternate credentials and the associated documentation. If recommended for approval, the dean forwards the materials to the Vice President, Academic and Student Affairs. Otherwise, the dean returns the materials to the department head with a request for additional documentation or an explanation for the denial.

- c. The Vice President, Academic and Student Affairs, reviews the memo and associated documentation and either approves or denies the request. If the Vice President denies the request, he or she returns the memo and associated materials to the dean and department head with an explanation for the denial. The decision of the Vice President, Academic and Student Affairs is final.
- d. If the Vice President approves the request, the approved memo requesting the alternate credential review and the associated documentation is forwarded to the Office of Human Resources for placement in the employee's personnel file. A copy is retained in the Office of the Vice President, Academic and Student Affairs, for purposes of documenting credentials.
- e. If approved, a copy of the memo is returned to the department head, who enters the appropriate information into the Instructor Eligibility task in Workday and ensures that the documentation of the alternative credentials is present and complete in the personnel file.

#### Evaluation of International Credentials

An individual with an international degree must have his or her coursework evaluated for U.S. equivalency by an evaluation service affiliated with the National Association of Credential Evaluation Services (NACES). The applicant is responsible for requesting the evaluation and for the cost of the international transcript evaluation as well as any related report(s). Advisory statements on educational equivalency are prepared on request.

#### Operational Definitions

Credentials: Academic qualifications of a faculty member. For courses intended for academic transfer, the minimum credential is a master's degree in the qualifying field, or a master's degree in any field plus 18 graduate semester hours in any qualifying field.

Course: A credit individually designated unit of instruction within the *College Catalog* or schedule of course offerings.

Course section: A specific section of a course offered by the College.

Instructor of Record: A fully qualified faculty member responsible for the instruction in a given course section and for the evaluation of students and assigning of grades for the section. This faculty member is listed as the Primary Instructor in the Instructor Eligibility task in Workday and also referred to as a Primary Instructor.

Program Director/Coordinator: A fully qualified faculty member responsible for coordinating educated programs to assure that each contains essential curricular components, had appropriate content and pedagogy, and maintains discipline currency.

Team Instructor: A fully qualified faculty member who is not the instructor of record but who provides instruction for the course, usually in laboratory or clinical setting or in specific modules in a course, under the supervision of the instructor of record.

Secondary Instructor: A faculty member who may not meet credentialing requirements to serve as the instructor of record for a course, does not have grade assigning privileges, and serves under the supervision of the instructor of record. A secondary instructor may provide instruction in a specific module in a course in which he or she has expertise or experience or may supervise students in experiential learning activities such as internships, clinical experiences, laboratory experiences, or other settings.

This manual may be revised to reflect continued compliance with the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC), the State Board of Education, or Pensacola State College faculty credentialing requirements.

**PENSACOLA STATE COLLEGE**  
**MANUAL OF PROCEDURES**

Procedure Title:	Minimum Qualifications for Instructional Personnel	<u>Number</u> 437
Related Policy:	Faculty Qualifications – 6Hx20-4.027	<u>Page</u> Page 1 of 56

**I. Purpose**

The purpose of this procedure is to provide assistance to individuals responsible for faculty selection and credentialing at Pensacola State College (PSC). All full-time faculty members and all part-time faculty members serving as an instructor of record, or primary instructor, are required to meet the standards set by the College and the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC). This faculty credentials manual delineates the credentials required to teach courses in each discipline and program offered at PSC.

Responsible Official:	Vice President, Academic and Student Affairs	
President's Signature:		Date: 11/20/2023

# FACULTY CREDENTIALS MANUAL

## Introduction

The Faculty Credentials Manual provides assistance to individuals responsible for ensuring compliance with faculty selection and credentialing requirements at Pensacola State College (PSC). All full-time and part-time faculty members are required to meet the standards set by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) and PSC. This manual delineates the credentials required to teach courses offered at PSC.

SACSCOC addresses faculty credentials in Comprehensive Section 6: Faculty in *The Principles of Accreditation: Foundations for Quality Enhancement*:

Qualified, effective faculty members are essential to carrying out the mission of the institution and ensuring the quality and integrity of its academic programs. The tradition of shared governance within American higher education recognizes the importance of both faculty and administrative involvement in the approval of educational programs. Because student learning is central to the institution's mission and educational degrees, the faculty is responsible for directing the learning enterprise, including overseeing and coordinating educational programs to ensure that each contains essential curricular components, has appropriate content and pedagogy, and maintains discipline currency.

The information included in this manual delineates the minimum qualifications and qualifying fields associated with each course offered at the College. Organization is by level (Career Certificate, Developmental Education, Lower Level, and Upper Level) and alphabetical order by course prefix within each level. For cases in which qualifications are not clear, the appropriate dean, in consultation with the Vice President, Academic and Student Affairs will render a final decision on qualifications or the need for alternative credentialing.

## Alternate Credentialing

To request approval of credentials through alternate documentation, the following procedure is followed:

- a. The department head drafts a memo requesting approval for the faculty member to teach specific courses based upon alternate credentials. The memo includes an outline of the justification of the alternate credentials; documentation of those credentials is attached.
- b. The supervising dean reviews the memo requesting approval of alternate credentials and the associated documentation. If recommended for approval, the dean forwards the materials to the Vice President, Academic and Student Affairs. Otherwise, the dean returns the materials to the department head with a request for additional documentation or an explanation for the denial.

- c. The Vice President, Academic and Student Affairs, reviews the memo and associated documentation and either approves or denies the request. If the Vice President denies the request, he or she returns the memo and associated materials to the dean and department head with an explanation for the denial. The decision of the Vice President, Academic and Student Affairs is final.
- d. If the Vice President approves the request, the approved memo requesting the alternate credential review and the associated documentation is forwarded to the Office of Human Resources for placement in the employee's personnel file. A copy is retained in the Office of the Vice President, Academic and Student Affairs, for purposes of documenting credentials.
- e. If approved, a copy of the memo is returned to the department head, who enters the appropriate information into the Instructor Eligibility task in Workday and ensures that the documentation of the alternative credentials is present and complete in the personnel file.

#### Evaluation of International Credentials

An individual with an international degree must have his or her coursework evaluated for U.S. equivalency by an evaluation service affiliated with the National Association of Credential Evaluation Services (NACES). The applicant is responsible for requesting the evaluation and for the cost of the international transcript evaluation as well as any related report(s). Advisory statements on educational equivalency are prepared on request.

#### Operational Definitions

Credentials: Academic qualifications of a faculty member. For courses intended for academic transfer, the minimum credential is a master's degree in the qualifying field, or a master's degree in any field plus 18 graduate semester hours in any qualifying field.

Course: A credit individually designated unit of instruction within the *College Catalog* or schedule of course offerings.

Course section: A specific section of a course offered by the College.

Instructor of Record: A fully qualified faculty member responsible for the instruction in a given course section and for the evaluation of students and assigning of grades for the section. This faculty member is listed as the Primary Instructor in the Instructor Eligibility task in Workday and also referred to as a Primary Instructor.

Program Director/Coordinator: A fully qualified faculty member responsible for coordinating educated programs to assure that each contains essential curricular components, had appropriate content and pedagogy, and maintains discipline currency.

Team Instructor: A fully qualified faculty member who is not the instructor of record but who provides instruction for the course, usually in laboratory or clinical setting or in specific modules in a course, under the supervision of the instructor of record.

Secondary Instructor: A faculty member who may not meet credentialing requirements to serve as the instructor of record for a course, does not have grade assigning privileges, and serves under the supervision of the instructor of record. A secondary instructor may provide instruction in a specific module in a course in which he or she has expertise or experience or may supervise students in experiential learning activities such as internships, clinical experiences, laboratory experiences, or other settings.

This manual may be revised to reflect continued compliance with the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC), the State Board of Education, or Pensacola State College faculty credentialing requirements.
