

## **Program Effectiveness Data**

In addition to the goals and student learning outcomes listed elsewhere on this site, the performance of the program is reflected through program effectiveness data as defined by the Joint Review Committee on Education in Radiologic Technology (JRCERT) (20 N. Wacker Drive, Suite 2850, Chicago; IL 60606-3182, 312-704-5300, [www.jrcert.org](http://www.jrcert.org) or [mail@jrcert.org](mailto:mail@jrcert.org) ). Program effectiveness data includes the program completion rate, credentialing examination pass rate and job placement rate. Explanations of these measures and program data that correspond with the annual report most recently submitted to the JRCERT are noted below. This information can also be obtained at [www.jrcert.org/resources/program-effectiveness-data](http://www.jrcert.org/resources/program-effectiveness-data). Questions about program effectiveness data should be directed to the Program Manager.

The radiography program's 2014 annual report to the JRCERT reflected the following:

### **Completion Rate- January 1 through December 31, 2014**

This is an annual measurement of the number of students that began the program divided by the number of students that actually completed the program. The program's completion rate for 2014 was 92%. Twenty-three of the twenty-five students expected to graduate did so in 2014.

### **Credentialing Examination Pass Rate – 2010-2014**

This is the number of students that pass the American Registry of Radiologic Technologists (ARRT) certification examination on the first attempt within six months of graduation from the program. The figure reflects an average over a five-year span. The program's credentialing examination pass rate stated as an average from the years 2010 through 2014 is 92%. Eighty-five of the ninety-two graduates of this program taking the ARRT certification examination within six months of graduation passed on the first attempt.

### **Job Placement Rate- 2010-2014**

This is the number of students that gain employment in the radiologic sciences within one year of graduation versus the number that graduate and are actively seeking employment. The figure reflects an average over a five-year span. The program's job placement rate as an average from the years 2010 through 2014 is 84%. Sixty-eight of the eighty-one graduates seeking employment obtained employment in the radiologic sciences within one year of graduation.
