

Radiography Program Mission Statement

The mission of the Pensacola State College Radiography Program is to provide clinically competent radiography graduates who exemplify qualities of excellence in radiation safety and patient care. These graduates will be registry-eligible, entry-level radiographers who will enhance the healthcare community of the patients they serve, graduate radiographers who are proficient in radiation safety and patient care and who meet all competency standards required by the American Registry of Radiologic Technologists (ARRT).

Radiography Program Goals

- Program Goal #1: The student will be clinically competent.
- Program Goal #2: The student will demonstrate effective communication skills.
- Program Goal #3: The student will develop critical thinking skills.
- Program Goal #4: The student will model professionalism.

Radiography Program Student Learning Outcomes

1. The student will practice the safe application of radiation at all times, thereby protecting self, patients, and other personnel.
2. The student will produce diagnostic radiographs completely in the context of all radiographic criteria and techniques.
3. The student will use appropriate medical terminology and complete information in written and oral communication relative to patients, radiographers, and other medical staff.
4. The student will discuss procedures and care strategies with patients in a manner appropriate to the patient.
5. The student will adapt to new procedures, situations, and resources to meet the needs of the patients, routine, and trauma.
6. The student will critique images to determine quality and provide suggestions for correction.
7. The student will demonstrate a strong work ethic related to the profession.
8. The student will participate in continuous learning for ongoing development of knowledge and skills in the profession.
