

The Student Chapter of the Escambia Amateur Astronomers

Since 1959, the Escambia Amateur Astronomers' Association has promoted study of astronomy and space sciences in our schools and colleges. We have members from ages 8-80, and are sponsored by the Physical Sciences Department of Pensacola State College.

As such, student membership in this chapter is free; fill in the form below to get on our roster and "astro alerts" e-mail list serve. We also offer expanded club membership with loaner telescopes and a solar monocular for \$15. Contact Dr. Wooten if interested.

The EAAA hosts stargazes at Fort Pickens, Pensacola Beach's Gulfside Performance Pavilion, and Big Lagoon State Park. We hold monthly business meetings and programs at Pensacola State College. We have observing sessions outside the planetarium after these meetings if clear skies permit. Join us on Facebook at "Escambia Amateur Astronomers".

For more information on the student chapter and its plans and activities, contact our sponsor, Dr. Wayne Wooten, in room 1751 at the Pensacola campus, or phone him at (850) 484-1152 or e-mail him at wwooten@pensacolastate.edu.
