

PENSACOLA STATE COLLEGE

Earth Science – Section Syllabus

ESC1000, Section P1165

Fall 2025, Session A

Instructor: Dr. Ophelia George

Office: Pensacola Campus, Building 17, Room 1744

Phone: 850-484-1544

Email: ogeorge@pensacolastate.edu

Office Hours: TBD

Department Head: Dr. Vasanth Ramachandran

Department Head Phone: (850) 484-1106

Department Head Email: vramachandran@pensacolastate.edu

Final Exam Date: TBD

Last Date of Drop/Add: August 22, 2025

Last Date for Student to Withdraw: November 4, 2025

Course Description: Using the scientific method, critical thinking skills, data analysis, this course will examine the fundamental processes of the earth system, composed of an atmosphere, hydrosphere, lithosphere, biosphere, and exosphere, through time. The course will also explore interactions between these spheres, including critical analysis of scientific theories and emphasize Earth's connections with humans.

Class Meeting Time: T TH 11:00 A.M. - 12:15 P.M.

Class Location: Pensacola Campus, Room 1775

Semester Hours: 3 credit hours

Prerequisites: Placement at the college level or completion of the appropriate exit-level developmental course(s) with a grade of C or better.

Semester Offered: Fall, Spring, Summer

Course Designations: **College Transfer.** Meets AA General Education Core, Natural Sciences (Physical Sciences) requirement.

General Education Core Course Standard: Per Florida Statute 1007.25, "Natural science courses must afford students the ability to critically examine and evaluate the principles of the scientific method, model construction, and use the scientific method to explain natural experiences and phenomena."

Recommended Textbooks and Instructional Materials:

The Good Earth; McConnell; 5th ed.; 2021; 9781260466218, McGraw Hill Publishing

Methods of Evaluation: At minimum, the instructor will cover content which aligns with statewide and institutional learning outcomes for the course. The instructor will measure student performance using the following:

Grading Scale:	
90% - 100%	A
87% - 89.99%	B+
80% - 86.99%	B
77% - 79.99%	C+
70% - 76.99%	C
67% - 69.99%	D+
60% - 66.99%	D
Below 60%	F

Grading Calculation			
Assignment/Assessment	% of Total Grade	Duration	Total points per task group
Class activity (8 @ 15 pts each)	12%	Untimed	120
Attendance	3%	Untimed	30
Homework (6 @25 pts each)	15%	Untimed	150
Exams* (5 @100 pts each)	50%	60 minutes	500
Chapter quizzes (7) + Syllabus quiz	20%	25 minutes	200
Totals	100%	Total pts	1000

Assignments will include a mix of homework assignments, in-class activities, and chapter quizzes.

- o You will have three attempts for both the syllabus and chapter quizzes, with Canvas keeping your highest score. However, all attempts must be completed by the assignment deadline to avoid late submission penalties.
- o You will only have one submission attempt for homework assignments.

Exams will cover material from assigned readings, lectures, and any handouts, and will consist of multiple choice, matching, fill-in-the-blank, and short-answer questions.

- o Only one attempt is allowed for each exam. Ensure you complete the exam by the listed deadline, as there will be **no makeup exams** under any circumstances since Exam 5 can serve as a replacement for a missed or low exam score.
- o **Note:** While there are **5 exams** in the course, **only 4** will be required to satisfy the **exam portion of your grade**. Your **lowest test score** will be replaced by **your highest score**, **PROVIDING THAT THERE HAS BEEN NO CHEATING ON ANY OF THE EXAMS**. This allows you to use Exam 5 to replace a missed exam score. Alternatively, you can skip Exam 5 entirely, in which case it becomes your lowest exam score and will be replaced with the highest grade from one of the 4 earlier exams. At the end of the semester, your final exam scores will include your **highest exam score counted twice** and any extra credit applied to your second lowest exam score.
- o **Important:** Exams are **not open-book or open notes**. During the exam, you may **not use textbooks, notes, outside websites, or any resources other than your memory**. Any unauthorized use of materials will be considered cheating and result in penalties as outlined in the academic integrity policy.
- o **Exam 5 will be proctored using Proctorio software**, which works best with Google Chrome. If you are unable to use Proctorio, you must arrange in advance to take a paper copy of the exam at your nearest Campus testing site.

In general, I aim to post completed grades within a week of the assignment deadline.

Assignment Due Dates

All assignments deadlines will be clearly listed in Canvas as well as in the tentative schedule below. Late assignment submissions are strongly discouraged as there will be a 5% deduction for each day that the assignment is late. A **temporary 0 (zero)** will be placed for assignments that have not been submitted by the time that I have completed the grading for that set of assignments; this will be **changed** if the student submits their assignment before the final submission allowance. The final submission allowance is determined by the Exam related to that assignment. If the **exam where the material in the assignment is being tested has passed**, then the assignment will no longer be accepted, and the student will receive a permanent 0 on the assignment. With the 5% late penalty, your score on the exam will also be zero after 20 days past the due date regardless of the number of days left until the “available until date” arrives.

Lecture attendance:

I strongly recommend attending every lecture. If you miss a class, it is your responsibility to obtain notes and any handouts from a fellow student. Your first two absences will not affect the attendance portion of your grade. However, if an absence occurs on a day when we complete an in-class activity, you will forfeit the grade for that assignment, as makeups are not permitted. While I may not formally withdraw you from the course, class participation and attendance account 15% of your overall grade, so missing multiple classes will impact your final course grade. Please be considerate by arriving on time and silencing all cellphones during class.

How to do well in this class:

- Read the assigned reading before attending the lecture in which that material is covered.
- Answer the review questions posed throughout the chapter.
- Do a thorough job preparing your study guide and reviewing for exams.
- **Time Expectations:** Students enrolled in this 3-credit course can expect to spend 6 hours/ week engaged in preparation (reading) and “doing” (exercises, quizzes). Of course, the amount of time varies from individual to individual.

Responsible Use of Artificial Intelligence (AI)

Artificial Intelligence (AI) tools, such as ChatGPT, Grammarly, and other writing assistants, can be useful for brainstorming ideas, refining writing, and improving clarity. However, **AI SHOULD NOT** replace your own critical thinking, analysis, or effort. Submitting AI-generated responses **without** meaningful engagement or modification is considered **academic dishonesty** and will be treated as plagiarism.

Whether or not you plan to pursue science in the future, college is about strengthening your ability to think, reason, and communicate effectively. Like any muscle, your brain becomes stronger when you actively use it. Learning happens through the process of formulating ideas, making mistakes, and refining your understanding—not through blindly copying content.

If you choose to use AI, you must:

- Use it to **enhance** your work, not replace it.
- Critically evaluate AI-generated content for accuracy and relevance.
- Ensure that all submissions reflect **your own thinking and understanding**.
- **Cite AI-generated content** when appropriate, just as you would with any external source.

Failure to adhere to these guidelines may result in a **zero on the assignment, a report to the Office of Student Conduct**.

Student Expectations: Students enrolled in this course can expect the following:

1. Clearly identified course objectives;

2. Productive class meetings;
3. A positive learning environment;
4. Opportunities for appropriate student participation;
5. Effective instruction;
6. Positive and appropriate interactions;
7. Assistance with meeting course objectives during and beyond class hours;
8. Evaluation of student performance and appropriate and timely feedback; and
9. Clear and well-organized instruction.

Course Learning Outcomes:

1. List and/or identify the most common elements, minerals, and rocks of the earth's crust.
2. Diagram the rock cycle and correlate rock types with the environment in which they are formed.
3. Understand the actions and interactions of external processes such as wind, weathering, mass wasting, and the general role of water on the earth's crust including streams, ice, and underground water.
4. Recognize the internal processes such as earthquakes, plate tectonics, igneous activity, mountain building and geologic structures and the theories related to these processes.
5. Discuss the geologic features of the ocean floor and explain the dynamics of the ocean floor.
6. Describe the composition and structure of the atmosphere focusing on the elements of weather in relation to earth processes.
7. Appreciate earth's place in the universe regarding the general nature of galaxies, stars, and the solar system.

General Education Student Learning Outcomes:

Critical Thinking: The student analyzes, evaluates, and, if necessary, challenges the validity of ideas, principles, or data in order to develop informed opinions, probable predictions, or defensible conclusions.

Scientific and Mathematical Literacy: The student properly identifies and applies scientific or mathematical principles and methods.

Information Literacy: The student effectively locates, evaluates, and applies information from a variety of sources.

Academic Dishonesty Statement: Pensacola State College is committed to upholding the highest standards of academic conduct. All forms of academic dishonesty, to include plagiarism and cheating, are prohibited. Penalties for academic dishonesty include but are not limited to one or more of the following: the awarding of no credit on the assignment, a reduction in the course grade, or the assignment of a final course grade of F and removal from the course. See the *College Catalog* for more details:

<https://catalog.pensacolastate.edu/content.php?catoid=2&navoid=47#academic-honesty>

Student Email Accounts: Pensacola State College provides an institutional email account to all students enrolled in courses for credit. This institutional email account is the official method of communication, and students must use this account when communicating with the College. In cases where companion software is used for a particular class, email may be exchanged between instructor and student using the companion software.

Flexibility: It is the intention of the instructor to accomplish the objectives specified in the course syllabus. However, circumstances may arise which prohibit the fulfilling of this endeavor. Therefore, this syllabus is subject to change. When possible, students will be notified of any change in advance of its occurrence.

ADA Statement: Students with a disability that qualifies under the American with Disabilities Act Amendments Act of 2008 (ADAAA) must self-identify with the Student Resource Center for ADA Services (SRC/ADA). Disabilities covered by the ADAAA may include learning, psychiatric, physical disabilities, or chronic health disorders. Students can contact SRC/ADA if they are not certain whether a medical condition/disability qualifies. SRC/ADA is located on the Pensacola campus in building 6, room 603, [ADA-services@pensacolastate.edu](mailto:ada-services@pensacolastate.edu), 850-484-1637. Students may also complete the online intake form in the ADA Services app within the PSC apps dashboard.

Equity Statement: Pensacola State College does not discriminate against any person on the basis of race, ethnicity, national origin, color, gender/sex, age, religion, marital status, pregnancy, disability, sexual orientation, gender identity, or genetic information in its educational programs, activities, or employment. For inquiries regarding Title IX and the College's nondiscrimination policies, contact the Dean of Students at (850) 484-1759, Pensacola State College, 1000 College Blvd., Pensacola, Florida 32504.

Security Statement: Pensacola State College is committed to encouraging all members of the College community to be proactive in personal safety measures. In case of emergency, students should ensure that they are aware of the building exit closest to each of their classrooms, as well as all alternative building exits in case circumstances require using a different route.

Emergency Statement: In the case of severe weather or other emergency, the College administration maintains communication with appropriate state and local agencies and makes a determination regarding the cancellation of classes. Notices of cancellation will be made through the College's PSC Alert system and on the College's website.
