OK **Cancel**

4. Click **OK**.
5. Fill in the appropriate information for your request, the form can be found on the following pages.

Request for Security

Please use this request for any changes or updates to a worker's security. This request is specific to any situations itemized below:

- Changing the ability to view or modify any data.
- Changing the access to a business process.
- Changing a business process configuration (including notifications)
- Providing access to run a report.

Describe the Request *

1

Please answer the following questions to help us better understand the Workday security change(s) you are requesting. Here is a [link](#) to the Job Aid for how to create a Workday Security Request in Workday.

Please provide your PSC email address and phone number in case further information is required by the Workday Security Administrator assigned to this request. (Required)

Who needs this access? Please include the employee's full name. More than one employee can be listed in this security request. (Required)

Please explain what access needs to be granted. Is there a specific task or report this individual or security group needs to access? If so, please specify and be as specific as possible.

If the security is specific to granting access or changing any part of a business process, please make sure to include the name of the business process. (Required)

If applicable, please provide any screenshots of the modules or screens you want to be certain are included in this access request.

In which tenant does this request need to be deployed (e.g., Sandbox, Preview, or Production)? Remember, all major configuration changes must be tested and validated in an environment outside of Production before being placed in Production? A major configuration change is considered a change in business process, a creation of a new security group, or a change to a functional configuration like an academic level or supervisory organization. (Required)

Production

What is the type of security change being requested? (Required)
