

Invitation to Bid
DTV Encoder System Replacement for
WSRE-TV Project
RFP 9-2019/2020

ADDENDUM #2

- 1. QUESTION REGARDING # 4:** We will need to know what the make and model of the old mux is in order to specify the correct interface. Note that there is no ASI output available for the new GuideBuilder platform. If ASI is required, then the old GuideBuilder cannot be used as a trade-in.

ANSWER: The old mux is a Tandberg MX5620. It only accepts ASI PSIP data. Our newer Guidebuilder is a Dell R310 (ASI Only) will continue to supply it. The other Guidebuilder is a Dell 1950 (also with ASI only) we desire to trade in if possible or retire it.

- 2. QUESTION REGARDING # 5:** If it is only the X2S then that means it will not "feed the old system".

ANSWER: Correct it will only feed the new x2S.
